¹Population projections/estimates are revised as historical data becomes available and the rates may not agree with previous reports.

²Rates are per 1,000 females 15 to 44 years of age.

³Ratios are per 1,000 live births.

*Population source for 1991 through 1999 are from earlier baseline projections.

2002 Technical Appendix:

Abortions

Technical Appendix

Section 76-7-313, Utah Code Annotated 1953 as amended requires that the report of induced termination of pregnancy (Figure A) be filed with the State of Utah's Department of Health within ten days after the abortion.

The reported number of abortions to Utah residents that are performed out of state is small and suggests an undercount. This small number of reported abortions that occur in other states are not shown by county of residence in this report.

For both the summary and reference tables in this report, data are tabulated by health district as well as county of residence to meet the needs of local health departments.

Population data are from the Demographic and Economic Analysis section of the Governor's Office of Planning and Budget.

Formulas used to compute rates and ratios used in this report are defined as follows:

$$\text{Abortion Rate} = \frac{\text{Total Number of Induced Abortions to Resident Females (1,000)}}{\text{Total Number of Resident Females 15-44 Years of Age}}$$

$$\text{Abortion Ratio} = \frac{\text{Total Number of Induced Abortions to Resident Females (1,000)}}{\text{Total Number of Live Births to Resident Females}}$$
